From the melodic strains of Simon and Garfunkel-styled vocal arrangements to the way-out freaky-jams of Zappa and the Mothers, the Fools are sure to earn a place in any serious collection.

Some of the artists the Fools draw an influence from are: Pink Floyd, Simon & Garfunkel, Neil Young, Pearl Jam, Frank Zappa and Bruce Springsteen, among others - see if you can tell where the songs get their initial creative spark!

With the summer of 2007 nearly behind them, the Fools collected a diverse mix of tunes and assembled THE EP for release to the fans. Instantly popular, the EP has enjoyed downloads and listens from across the globe - further indications that the Fools music whets any appetite!
